

**1. Write a program to ascending sort the elements from the following list. (Create a function to solve it)**

List = [1, 5, 2, 9, 3, 22, 13]

Solutions:

```
1     def ascendingList(getList):
2         getList.sort(key=None, reverse=False)
3         return getList
4
5     List = [1, 5, 2, 9, 3, 22, 13]
6     print(ascendingList(List))
```

Output:

[1, 2, 3, 5, 9, 13, 22]
